PROJECTS / OPEN-SOURCE

FITNESS-PLANET | LINK   HTML, CSS, JavaScript, Email.js

* Significantly deepened proficiency in frontend development, designing and implementing responsive and intuitive user interfaces using advanced CSS techniques and robust JavaScript functionalities.
* Drove core feature development, ensuring seamless user experience, and fostering effective team collaboration.
* Reinforced skills in dynamic web application development, problem-solving, and efficient version control.

FOCUSORAHQ | LINK   HTML, Tailwind CSS, JavaScript, React, Email.js

* Developed FocusoraHQ, a productivity platform designed to help users combat distraction and improve focus through customizable workspaces, collaborative study rooms, and gamified analytics.
* Led the design and development of core features including integrated to-do lists, custom Pomodoro timers, Spotify-powered ambiance controls, and real-time collaborative study rooms to enhance user engagement.
* Collaborated with a team to create an intuitive and scalable web platform, focusing on user-centric design, responsive UI/UX, and seamless integration of productivity tools.
